Diesel Winter Mix

NEW

JLM Diesel Winter Mix prevents waxing & gelling in diesel fuel & heating oil in cold temperatures to -40°C^* , using the latest, proven additive technology to allow your vehicle to continue operating in cold climates.

Product information

This premium quality winter diesel fuel additive from JLM meets the demands for cold winter ahead, providing protection against waxing, gelling and fuel line freeze for temperatures as low as -40°C^* .

JLM Diesel Winter Mix is a non hazardous formulation, making it safe to use, and store around the home.

- Prevents Gelling and Waxing of diesel fuel
- Reduces Cold Filter Plugging Point
- In severe conditions use double dose rate
- Fully compatible with all diesel and heating oil fuels
- Easier cold weather starting
- Contains wax modifiers
- Do not add to fuel if fuel has already gelled
- Reduces misfiring

*In severe conditions use double dose rate

Use

Add 100ml to one tank of fuel (50 liters) during filling. For best results use every fill. 1 Liter treats 500 Liters of Diesel fuel or heating oil.

Cars- 100ml treats up to 50 liters of Diesel fuel.
